PREPROGRAMMES / PRE-PROGRAMS

SALLE B 16:00 – 17:20

EQUIPOP/SOLTHIS

The proposed event is part of a context of emergence of ODA and diplomacy “feminists”, put forward by Sweden, Canada and, more recently, France. It feeds the momentum created by the French presidency of the G7, which places gender equality at the heart of public policies.

The event will aim to reaffirm the urgency of mainstreaming gender equality in the fight against pandemics, particularly in response to HIV/AIDS. It will make the leadership of different stakeholders visible on this topic and identify avenues for accelerating progress towards the eradication of the pandemic and the reduction of gender inequalities, such as sexual and reproductive health in care packages and universal health coverage; promotion of sexual and reproductive rights; taking into account gender inequalities and social norms; the participation of young feminist associations.
